

Celebrations on the move

STANTON Vale School celebrated the first National MOVE (Mobility Opportunities Via Education) Day by raising funds for the school and M.O.V.E. Europe.

MOVE provides children and young people with complex physical needs a structured programme that enables them to develop their skills in walking, sitting, standing so that they can participate in everyday activities, explore and have fun with greater independence.

Stanton Vale School has used the MOVE programme for 12 years and celebrated the success of its young people, with children and young people showing staff how they could "sit up straighter", "stand up taller" and "walk much, much further".
